New York-Presbyterian Queens designates this live activity for a maximum of **3.25 AMA PRA Category 1 Credit(s)**[™]. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Disclosure Statement

New York-Presbyterian Queens relies upon planners and faculty participants in its CME activities to provide educational information that is objective and free of bias. In this spirit, and in accordance with the guidelines of MSSNY and ACCME, all speakers and planners for CME activities must disclose any relevant financial relationships with commercial interests whose products, devices or services may be discussed in the content of a CME activity that might be perceived as a real or apparent conflict of interest. Any discussion of investigational or unlabeled uses of a product will be identified.

Statement of Need

The field of surgery is a dynamic and ever-evolving discipline, constantly propelled forward by ongoing research and technological breakthroughs. The 1st Annual Conference hosted by New York-Presbyterian Queens Department of Surgery is dedicated to exploring these latest advancements in surgical practice. This comprehensive program offers a platform for education and presentations, delving into cutting-edge topics such as robotic surgery for gastric and rectal cancer, innovative approaches to breast cancer surgery, transcervical carotid artery revascularization (TCAR), thoracic aortic endografting (TEVAR) for acute uncomplicated Type B aortic dissections, lower extremity revascularization, advance in bariatric surgery and effective management of thyroid cancer.

Educational Objectives By the end of this educational event, participants will be able to:

- Recognize and embrace the latest developments in surgical techniques.
- Recognize the importance of surgical therapy within a multidisciplinary approach.
- Comprehend the evolution of minimally invasive surgery.
- Appreciate the advances and applications of robotic surgery.
- Understand the modern indications for and techniques for vascular surgery.
- Understand the role of robots in general and bariatric surgery.

Target Audience

Surgeons, primary care physicians, ER physicians, residents, fellows, interns, medical students, physician assistants, nurse practitioners, registered nurses and others caring for patients with various surgical conditions.
